**Alina Nunez, Healer**

Alina Nunez is a Healer and uses Iridology and Applied Kinesiology to detect health issues. Her healing techniques include: hands-on healing, spiritual counseling, meditation, yoga, pilates, aromatherapy, acupressure, and reflexology. Her angelic and spiritual guidance teaches people **Spiritual and Universal Laws**.

**Occupation:** Natural Health & Nutritional Consultant & Healer

**Where do you reside in South Florida?** Miami Shores, FL

**Tell us how you decided to become a healer and when did you realize your power?**  
I was told I was a healer in the year 2000 by a woman who was a median and was at my home doing my Astrological chart. So I had a talk with God, meaning I prayed on it for several days. I basically asked for guidance and accepted my gift. Soon after that I met a woman who was a Healer and was pressing her on having a class. I ended up taking my father to see her for a health issue and assisted her in the healing. Soon after that, she got into a huge car accident and I would visit her and perform healings. After three sessions, she looked at me and said, "you are divinely guided, you don't need classes go out and heal".

**How do people respond when you tell people about what you do for a living?**  
At first (year 2000) people didn't understand and looked at me with a face of astonishment or confusion. Nowadays, people seem to be more aware and accepting of this gift. In fact, the last person I told I was a Healer said to me, "God bless you, we need more people like you".

**What is the most challenging part of your job and what do you enjoy the most?**  
The most challenging part of my job is convincing my clients that they must take the supplements how I have indicated for the best results. They must also eat as I have indicated, practice their positive affirmations and meditate.

I love watching my clients Heal. Watching their eyes and faces light up after a healing or as they come in to report how much better they are feeling. This is priceless. Please see the Testimonials section of my website.
